

ARC FUNGUCIDE HC

A new ecologic fungicide based on (TCMTB)

Properties

Appearance	:Dark Brown clear liquid
Active Substance	:98+-2% TCMTB %30
pH	:4+-0,1 Sol.%10
Shelf Life	:12 months original container.

Characteristics

- *Easily emulsifiable in warm water.
- *Broad-spectrum micro biocide activity.
- *Does not cause foaming.
- *No hazardous solvent in content.
- *It is biodegradable.
- *Formulated specially for chrome leather.
- *Can be used in fat liquoring process.

Applications

ARC FUNGUCIDE HC is specially designed for chrome leather in order to get optimum effect of ARC FUNGUCIDE HC we suggest applying in the pickle and chrome process. ARC FUNGUCIDE HC is not suitable to apply at alkaline pH above 7. Avoid using in alkaline condition. ARC FUNGUCIDE HC is applied as a dispersion in water. ARC FUNGUCIDE HC and water ratio is 1/20. Fungicide must be

prepared and used as soon as the solution is made. For long time keeping the solution is not stable.
